Preparation Checklist for Mulch Installation

We recognize and appreciate your choice of *Southern Greens* for mulch blowing installation. We take pride in our work and ask for your assistance. Please help us to provide you a quality and efficient service through your cooperation with the following items prior to our arrival:

- ➔ Bed Cleanup – Make sure the landscape beds are free of weeds, leaves, and toys. This reduces the amount of mulch required and your resulting costs, is safer for plant materials by not building up mulch around the base while trying to cover, and eliminates the chance of lost or damaged toys.
- ➔ Irrigation – Make sure the irrigation systems do not run the day of our installation. Moisture on plants, driveways, and houses will attract the mulch dust during installation and create extra work during cleanup. Dyed mulches also require no moisture after installation for 24-48 hours to help lock in the color.
- ➔ Cars – Prior to our arrival, make sure that the driveway and garage are clear of any vehicles that you may require during our installation.

Thank you in advance for your cooperation with these requests. We look forward to providing you a quality service now and in the future.
